János Nádas

Mechanical Engineer

Budapest, Hungary | +36 20 386 0097 | ndsjnk@gmail.com | nadasjanos.github.io | linkedin.com/in/janos-nadas

Profile

I spent eleven years working at the machines – today I lead a quality team of 8–10 people in the same industry. This path is my greatest advantage: I understand quality problems not only from the office but from the shop floor. As a mechanical engineer and Chief Quality Officer (CQO), together with my team I reduced customer complaint costs by 51% and internal nonconformities by 33%, and we closed the external certification audit with zero major nonconformities. I work from data: I identify root causes, support top management decisions with KPI reports, and automate wherever possible – for example, using AI tools I set up a management report on delayed orders that updates daily from ERP data without any manual work. With UT2/PT2 non-destructive testing and IATF 16949 / ISO 9001 auditor qualifications, I am a professional who understands technology, systems and people alike.

Hard Skills

Quality Management and Audits

- Operating and developing the ISO 9001 quality management system; keeping procedures and work instructions up to date
- Conducting internal audits; preparing and supporting certification and customer audits
- Supplier audits, control of subcontracted processes
- Applying PED 2014/68/EU and AD 2000 requirements; managing welding personnel qualifications and welding procedures
- Developing and delivering quality training

Complaints and Problem Solving

- Customer complaint handling (including foreign customers, in English), 8D reports
- Root cause analysis, corrective actions; FMEA, SPC
- Quarantine and disposition of nonconforming products, documentation and release
- KPI reporting and analysis, monthly nonconformity evaluations

Production Support and First Article Approval

- Checking orders against the released process documentation, change management
- Reviewing work instructions and specifications, defining critical points; applying manufacturing standards
- First article / sample approval: customer drawing approval, trial production, customer first article acceptance; documentation (drawing approval, measurement reports, material certificates)
- Defining sample parts and in-process inspections

Testing, Measurement and Certification

- Raw material conformity checks, certificate review, chemical composition classification
- Validating manufacturer certificates, issuing certificates to customers; acceptance of third-party certified products
- Tensile and impact testing (Charpy); non-destructive testing: UT2, PT2
- Developing and running the measuring equipment control system (calibration, gauge register); measuring with hand-held instruments

Software and AI

- MS Office (Word, Excel, PowerPoint); ERP system (Szilanus)
- CAD: AutoCAD, Solid Edge; CAM: EdgeCAM
- Confident use of AI tools: Claude (Claude Code), ChatGPT, Canva, HeyGen
- AI-supported process automation: extracting ERP data, automatically updated Excel reports

Licences

- Category B driving licence; forklift and crane / lifting equipment operator licences

Soft Skills

Cost-conscious mindset • Ownership mindset • Problem solving • Strong communication skills • Team leadership (8–10 people) • Organisational skills • Independent decision-making • Analytical thinking • Conflict management and motivation

Professional Experience

Chief Quality Officer (CQO) 2023 – present
Technokov Kovácsoló és Lemezsajtoló Kft. (forging and sheet metal pressing)

- Full maintenance and development of the ISO 9001:2015 QMS in a manufacturing environment, in daily contact with production
- Customer complaint handling and 8D reports – independently handled a complaint from a foreign customer in English
- Root cause analysis of production losses and nonconformities (man–machine–material–method), developing scrap reduction measures
- Customer complaint costs reduced by 51% and internal nonconformities by 33% through a regular internal audit programme and a structured complaint handling process
- Successful external certification audit – zero major nonconformities
- Applying the PED 2014/68/EU directive and AD 2000 requirements, managing welding personnel qualifications and welding procedures
- Leading first article approval for new products (e.g. railway dished ends): customer drawing approval, trial production, customer first article acceptance
- Developing and running the measuring equipment control system (calibration, gauge register)
- Complete QMS documentation review: updating E, U and MK series documents, adding risk analysis and KPI sections
- Preparing monthly management reports and KPI dashboards for top management
- Automated the management report on delayed orders: daily updates from ERP (Szilanus) data with no manual intervention
- Planning and delivering quality training for shop floor employees

Quality Control Team Leader 2020 – 2023
Technokov Kft.

- Organising in-process and final inspections, shift scheduling and workforce planning
- Identifying, documenting and escalating nonconformities in cooperation with production

Quality Inspector 2017 – 2020
Technokov Kft.

- Incoming goods inspection, in-process and final inspection

CNC Machine Operator / Flame Cutter 2006 – 2017
Technokov Kft. | *Sebestyén Lángvágó Kft.* | *Ganz Acélszerkezet Zrt.*

- CNC machine operation, flame and plasma cutting in an industrial production environment

Education

BSc in Mechanical Engineering, CAD-CAM specialisation 2019 – 2022
Óbuda University – Bánki Donát Faculty of Mechanical and Safety Engineering

Secondary school leaving certificate (Érettségi) 2017 – 2019
Budakalász Gimnázium

Vocational qualification: car body mechanic 2000 – 2004
Budapesti Gépészeti SZC Csonka János Technikum

Training and Certifications

- AI usage training – Blue-Gap (in progress, 30 Sep – 16 Dec 2026)
- IATF 16949 & ISO 9001 internal and supplier auditor – Kvalikon (2025)
- FMEA – Failure Mode and Effects Analysis – Kvalikon (2023)
- UT2 – Ultrasonic testing, Level 2 – Hidra Felnőttképző (2024)
- PT2 – Penetrant testing, Level 2 – Hidra Felnőttképző (2023)
- Forklift operator (3324) – OK-TAT-60 Kft. (2013)
- Crane / lifting equipment operator (4361) – OK-TAT-60 Kft. (2011)

Languages

- Hungarian – native
- English – pre-intermediate / intermediate; independently handled a customer complaint in English
